

# '79-04 Mustang Rear Coil-Over Conversion

The Chassisworks' rear coil-over conversion uses a true coil-over shock designed specifically for damping and travel requirements of the Fox chassis. The system utilizes OEM mounting locations and can be used with direct-fit FAB9™ or factory rearend housings. An adjustable lower shock mount is optionally available for both FAB9™ or factory housings. Each end of the shock features spherical bearings which enable the shock to misalign as needed and avoids unpredictable, untunable, bushing deflection. The upper spherical mount is a unique, extended-stem-style configuration that lowers the upper spring seat for additional tire clearance. The stem features an easily accessible zerk fitting to inject grease directly onto the bearing contact surfaces. Shocks are available with 16-position, single- or double-adjustable damping. Kits include coil-over shock, choice of spring rate, and VariShock spanner wrench. Optional adjustable lower shock mounts available.

| 5811-M40      | ADJUSTABLE MOUNT,S OEM HOUSING (PAIR)      | \$99.00 |
| 5811-M41      | ADJUSTABLE MOUNTS, FAB9™ HOUSING (PAIR)    | 89.00   |
| VAS 861M1-615 | VARISHOCK COIL-OVER KIT, QUICKSET 1 (PAIR) | 628.00  |
| VAS 862M1-615 | VARISHOCK COIL-OVER KIT, QUICKSET 2 (PAIR) | 828.00  |

## ■ Adjustable Lower Shock Mount - Fox Chassis

The adjustable lower shock mount kit enables ride height to be adjusted without adjusting spring preload or adversely affecting available shock travel. Adjustments are made in 7/16" increments to a maximum of 2-5/8". Kits consist of billet steel mounting blocks, precision laser-cut mounting tabs, and 3/8" Grade 8 mounting hardware. Available for use with OEM or FAB9™ rearend housings.

- ▶ Grease Zerk Fitting
- ▶ Spherical Stem Mount
- ▶ Choice of Spring Rate
- ▶ Billet Aluminum Body
- ▶ Threaded Body
- ▶ Locking Spring Collar
- ▶ 16-Position Adjustment
- ▶ Spherical Lower Mount
- ▶ Spanner Wrench Included
