

Bolt-In, OEM-Replacement VariStruts

Replace the factory struts in your '79-04 Mustang or '82-92 Camaro/Firebird with VariShock bolt-in struts, for use with OEM springs, or with our complete coil-over conversion kits to reduce weight and enable suspension tuning.

Street/Strip Coil-Over Conversion for '79-04 Mustang and '82-92 Camaro

Double-adjustable QuickSet 2 valving enables individual adjustment of compression and extension with sixteen settings available for each. VariStruts feature billet-4130 strut bodies and full-7/8" -diameter piston rods with threaded-stem tops. These are compatible with most 3/4" - or 16mm-bore aftermarket caster-camber plates.

Mustang VariStruts are available in stock- and lowered-height versions to accommodate ride heights ranging from stock to three inches below stock. Mustang applications require spindles with a 1" - or 3/4"-wide mounting boss. Camaro struts are built in the lowered configuration only. VariStruts are packaged in pairs. If your car is not listed, please ask about additional custom applications.

Coil-over kit includes springs, upper strut bearing mount with urethane bushing, upper spring seat, and threaded locking lower spring collar.

Strut-to-spindle mounting hardware and shims

■ Caster/Camber Plates

The Maximum Motorsports caster/camber plates provide the widest range of alignment settings possible. This ensures that the correct alignment can be achieved for any performance application. Plates are available with black-powder-coat or chrome finish.
