

Air Management

■ Air Tanks and Mounts

Two styles of air tanks are available, each featuring multiple inlet/outlet ports as well as a drain. The leg-mount version is a simple bolt-on, and can be easily secured to any suitable flat surface. The end-mount tank can be mounted between the frame rails, but requires welding to install the two frame brackets. Once the brackets are installed the end-mount tank is bolted into place.

Compressor Systems

■ Compressors

- Gearless, direct-drive electric motors
- Oil-less design requires no maintenance (beside filter inspection/replacement)
- Anodized piston cylinder for decreased wear
- Precision, high speed, durable bearings
- Efficient, oversized heat sink head assembly
- Vibration isolators for safe & quiet operation
- Thermal overload protection that protect compressor in event of overheating/over duty cycle operation (where applicable)

■ KP Digital Height Controller

Offering complete control of your air suspension system, KP Components new DHC series control unit has your needs covered! The DHC systems offer the utmost in flexibility to flawlessly operate any air ride system on the road today! All DHC systems offer unlimited control of the air ride system through not only the 3 user selectable preset heights, but full manual control of the air system for minor changes. If you already have an existing switch box in your vehicle, this system will work in conjunction with it. This system also features the "Auto Raise" innovation which will instantly

bring the vehicle to a safe driving height upon starting the vehicle! Handheld remote controls are also available to operate the vehicle's height for the absolute in convenience! The digital height controller utilizes proprietary sensors (4) to monitor the true vehicle height, regardless of cargo, fuel level, or pressure in the air bags. That way you are guaranteed to always have the vehicle raise to the same height everytime you press the button.

■ AirPod™ Self-Contained Compressor Systems

A completely self-contained compressor system, AirPod™ by Air Ride Technologies, conveniently mounts the tank, compressor(s), and valve set on one easily installed plate, eliminating tedious wiring and plumbing. AirPods™ are available in single-compressor 3-gallon-tank, or dual-compressor 5-gallon-tank versions with RidePro or LevelPro control systems.

- Factory wired, plumbed, and tested
- Four simple air-line connections
- Three electrical connections
- Saves 10 – 15 hours of installation time
- Compact size for easy installation
- Light weight aluminum tank
- Entire unit mounts with only four bolts
